Council Told Of Cows Dying Of Starvation At Fleming Ranch; Carcasses Near River Bank

Immediate Action Demanded From Department of Health; School Board Suggests Condemnation Be Given Installation of a Sewerage System for Main Streets.

Regular meeting of the council was held on Tuesday evening. Present Mayor Abousaffy; Councillors: Lowe, Ramsay and Wilson. The relief committee authorized to look into the matter of hospitalization for relief recipients stated that the local hospital board had a scheduled meeting next Sunday and that the matter would be discussed at that time.

Councillor Wilson reported on the inspection made at the proposed Memorial Park next to the Legion club. He made certain recommendations, but due to three councillors being absent it was decided that his report would be tabled and given greater consideration when a full council was present. At his suggestion, however, the creek bed will be cleaned as quickly as possible.

George Evans, chairman of the school board, was present and stated that his board was interested in the installation of a sewerage system to service the main streets of town. He remarked that the central and high schools cesspool system was causing considerable trouble and expense and in addition there were two or more cesspools on practically every business lot. Mayor Abousaffy stated that he had given some study to the question, his investigations having advanced to the point where he was assured an expert would be sent from Edmonton to give advice on the subject. It was also revealed that provincial sanitary engineer Menzies would be in town this month and that the subject would be discussed with him. Mayor Abousaffy warned, however, that the system, despite its urgent need, was only of secondary importance to that of the light and water question.

A. Fraser, ashman, was present and stated he had been trying for some time to secure a covering for his truck. He admitted the ash dust was a nuisance and would do his utmost to remedy the nuisance as quickly as possible. Mr. Fraser asked that council give consideration to a raise in wages during the winter months. He had figures to show his wages at the present time. Council, however, asked that he bring the matter up next July when a semi-annual report will be before them.

Correspondence was received from the Department of Health revealing that there must be a clear 25 feet between a residence and a disposal ground. The matter referred to Mr. O. Celli, who desired to build residences on lots which were at least 50 feet from the Grand Union disposal ground near the skating rink.

Police Chief Antle reported to council that a few days ago he had been told that eight dead cows were to be seen on the Fleming ranch, west of Coleman. Along with the RCMP he went out to verify the report. It was a cold, snowy day, but nevertheless, they saw four cows dead of starvation, one dying and five or six others which they

considered would be dead within a matter of a few days. Due to not being properly dressed to tramp through the deep snow, they were unable to find the four other reported dead cows. Some of the beasts were close to the river's edge. Constable Antle stated the place as a whole was filthy and urged council to take action despite the fact that the ranch was outside its jurisdiction.

A letter was authorized to be sent the Department of Public Health giving a picture of the situation and demanding immediate action to clean up the disgraceful condition prevailing at the Fleming ranch.

As if too many fears of local citizens regarding the water supply a report was read from Edmonton showing the latest water samples to be pure.

A letter was received from the General Construction Co., Lethbridge, stating it was in a position to handle any construction work the community may have planned.

A Thank You letter was received from the local Red Cross branch for the \$15 donation.

The mobile X-ray T.B. unit will visit Coleman in May, according to a letter received by its provincial superintendent, Mr. Dickey, Alberta secretary of the T.B. Association, will visit Coleman on Sunday, at which time a number of interested parties will meet him. Councillors Lowe and Wilson were appointed to represent the council at the meeting.

A requisition for \$12,166.75 was received from the C. N. P. Municipal Hospital District No. 40 to be paid this year. This amount will be added to ratepayers' taxes this year.

The decision to appoint a suitable man to valuate the Coleman & Water property was left in the hands of town solicitor D. G. MacLennan, of Calgary.

The money by law, totalling \$600, was given third and final reading. \$500 of this amount is an investment in the Memorial Park.

Dickey To Meet Local Committees Here Sunday

Prepare For Visit of X-Ray Mobile Unit to Visit Pass During Middle of May.

C. R. Dickey, provincial secretary of the Alberta Tuberculosis Association, will visit Coleman on Sunday and go into conference with committees from all Pass towns to draft plans for the forthcoming visit of the X-ray mobile unit which will examine all who wish for traces of tuberculosis.

Mayor Frank Abousaffy, who has been quietly working on the unit's visit here, has contacted the union executive and has been assured of that body's co-operation, as well as the co-operation of the unions of the other Pass towns, which will also be present at Sunday's meeting here.

In addition Mayor Abousaffy has invited two representatives from each of the council, school board, Lions, Elks, teachers and coal companies. The meeting will be held in the Community hall on Sunday at 1 p.m.

LOCAL AIRMEN GRADUATE

Two local airmen are spending furloughs at their respective homes here following graduation at RCAF schools.

Last Friday Arthur White, son of Mr. and Mrs. Wm. White, graduated from the Calgary RCAF school as a wireless air gunner. His parents attended the graduation.

Arthur Westworth won his wings as a pilot at Saskatoon and is here on a 30-day furlough. He is the son of Mr. and Mrs. A. B. Westworth.

U.L.C. APPEAL CASES

Several important changes in the appeal procedure in the Unemployment Insurance Commission regulations is announced in Ottawa. At present appeals are made to the courts of referees set up under the Unemployment Insurance Act. These courts will continue to deal with appeals, but doubts have now been removed as to whether courts may hear certain types of cases. Broadly speaking "any person feeling aggrieved may now lodge an appeal with his court of referees, and while formerly no second appeal was provided for, the arrangement now will be that a re-hearing of a case may be allowed, where, for example, additional facts are disclosed shortly after the court reaches its first decision."

Derbyshire Calls For Complete Decoration Of Business And Residential Sections On V-Day

States Numerous Flags In Stock At Various Local Stores; Bunting Should Be Used In Plentiful Supply.

George Derbyshire, chairman of the Coleman V-Day committee, has issued a call to all Coleman citizens to get ready for Victory Day, which appears to be in the not too distant future.

He has enquired at local stores and finds that many flags are available for those who wish to purchase them. He asks that all business men decorate their stores so that they will be a credit to the town. He does not want to see some merchants raise their windows half an inch, stick a flag out and think that is sufficient. "Let there be

Parents Asked To Encourage Youths In Gardening

No Entries Received as Yet in Lions Vegetable and Flower Garden Contest.

Possibly a little coaxing from the parents and a word of the enjoyment to be derived from gardening might result in some youngsters entering the Lions garden contest which is ready to be launched just as soon as some entries are received.

Committee chairman Adam Wilson states that the sooner entries are received the sooner the contest will get started. Those getting an early start with their seeds will have the advantage of a longer growing season than those who were a little slow in entering the contest. Mr. Wilson can be contacted any week day at his office in the Italian club on main street.

Students from grades 7 to 12 are eligible. Come on boys and girls!

Coleman Secures \$212 In Fireworks For V-Day Celebration

Good news was received on Tuesday morning by the V-Day committee when a letter was received from Toronto stating that \$212 of fireworks had been shipped to Coleman.

They are Daylight fireworks and will probably be fired on the flat piece of ground immediately east of Art. Fraser's residence on the hill overlooking town. However, this will be a point to be decided upon by the entertainment committee, of which Maurice Cooke is the chairman.

The cake being raffled by the Rebekah lodge will be drawn for at the tea and apron sale being held this Saturday.

Mrs. Nora Lathwaite and two sons returned home this week from Vancouver, where they had originally planned to reside.

ENQUIRY

Mrs. Louise Stanbery, 619 Bpess Street, Hopewell, Va., U.S.A., has requested The Journal to assist in locating the children of James William Lock, who were believed to have lived in or near Coleman, Alberta.

Anyone knowing their present whereabouts will please communicate with Mrs. Stanbery at the above address.

GET FAMILY ALLOWANCE FORMS AT POST OFFICE

Postmaster Frank Graham has a number of Family Allowance forms and all parents wishing to secure them need only ask at the wicket. The forms should be completed as quickly as possible and returned sealed in the envelope in which they are received.

numerous flags and a plentiful supply of bunting around all business places," he stated.

Brilliantly colored lights designed in a V will also show to advantage in store windows.

To the residential areas he wants flags and bunting to be prominently displayed and even asks that failing this, large colored lights such as were used at Christmas, be brought into play to dress windows, and so dress the town in a real gala setting.

Already eight strings of twelve lights to a string have been made ready and will be placed throughout the main streets within a few hours after the European war has been declared at an end.

Last Call For Blood Volunteers; Clinic Here Tues.

Slight Response Given to Last Week's Appeal; Still Many Names Required.

Only a very slight response was received to last week's urgent appeal for blood donors for the Red Cross Blood Clinic, which will visit Coleman next Tuesday morning.

President W. Dutil is afraid that some persons whose names were listed in The Journal a few weeks ago are taking it for granted that they will be called upon without the formality of registering. He wants to make it clear that the published list included persons whom the local executive were most anxious to have once again register as blood donors. The only means of knowing whether or not a person desires to be a blood donor is through registering his name with one of the three depts in town—The Journal office, Coleman Hardware or Miss A. Yull.

So little time remains now that it is a case of making up one's mind immediately as whether he is going to be a donor or not.

BLEITGEN ASKS FOR GREATER CARE IN FORESTS

The forest rangers in Alberta, from the provincial forests on the east slope of the Rocky Mountains and from the northern Alberta forest districts, have recently returned to their districts from forest ranger schools held in Calgary and Westlock. There they discussed all phases of forestry, including timber operations, big game, traplines and, most important of all, the protection of the forests that makes these and life in the province possible.

The season of fire hazard will soon be with us. The rangers are determined to do their part to save our forests. They cannot do this alone, but must have the hearty co-operation of all the good citizens of Alberta. Ninety per cent of our forest fires are caused by man, most of which are directly attributable to settlers' spring fires. The

"Coleman Curling Arena A Monument to Teamwork" States Sam Bannan; Curlers Held Banquet

Mayor Abousaffy Asks That Rink Be Known As Dow Rink; President Dow Plans Further Improvements This Summer.

Coleman curlers, with invited guests, held their annual curling banquet in the spacious dressing room of the new curling arena on Friday evening with over 100 in attendance.

The banquet took the form of a buffet supper and a long table was laden with food of all kinds from which the curlers filled their plates at will.

President Dow presided at a brief business session at which time the financial statement was read to show that the club still functioned on the right side of the ledger. Wes. Vincent's McGillivray cup rink was introduced, the skip revealing that an ambition of many years had been realized, that of being skip of a rink that would win the McGillivray cup. Other club prize winners were introduced, they being the Dow, Kerr and Ledoux rinks. Prizes had not arrived, but would be presented to the winning teams upon arrival.

President Dow revealed that much work remained to be done this summer. He planned on stuccoing the exterior of the building and boarding up the walls of the interior, thereby fully insulating the building. He also hoped to lay concrete on all four sheets so that

a minimum of flooding would give the curlers an early start next season. He appealed for greater assistance than that which had been forthcoming last year.

He stated that two carnivals would be sponsored during the year in conjunction with Coleman Elks and that the club's share of the proceeds would be used to finish construction of the rink. He appealed to his listeners to get out and work at the carnivals and make them successful.

Sam Bannan, vice-president of the Blaimore club, was present and paid the local club great tribute when he stated that the Coleman curling club was a monument to teamwork of the citizens of Coleman. Bill Meier, secretary of the Blaimore club, stated that he could pay no greater tribute to the Coleman club than by saying that Blaimore curlers would have far rather have played their games in the Coleman rink than in their own.

Mayor Frank Abousaffy paid tribute to President Dow by asking the membership to call the new rink the Dow rink, to which there was great applause. He lauded the work of those men who made the construction of the building possible.

A variety program was enjoyed till near midnight, when the party came to a close.

for this community service.

The day of Victory over the Nazi leaders will be a day when all should rejoice and give thanks to the Heavenly Father; it will mark the defeat of the forces which have stood for ignorance and slavery, by those who believe in the Light, the Right and Freedom. We hope that all who can will gather for this service of thanksgiving.

"O give thanks unto the Lord, for He is good; for His mercy endureth forever.

Let the redeemed to the Lord say so, whom He hath redeemed from the hand of the enemy."

"Oh that men would praise the Lord for His goodness, and for His wonderful works to the children of men." (From Psalm 107.)

THIRD DAY—The parade starts from Coleman at 1 p.m. and covers the route from Coleman to Blaimore, to Frank, to Bellevue, to Hillcrest. In absence of a Dominion or provincial proclamation, the necessary civic holidays to be proclaimed by the mayor.

Motorists are asked to park their cars clear of the route covered by the parade. Sgt. Mudman was appointed chief marshal.

WORLD HAPPENINGS BRIEFLY TOLD

Under its new post-war educational program Britain will require 15,000 new teachers per year, instead of the former 7,000.

The Belgian government obtained from Allied authorities permission to use German prisoners in Belgian coal mines.

Since the start of the war Canada has shipped to Britain about 2,846,200,000 pounds of bacon and other pork products.

Soviet Russia is pursuing a plan to shift industry and agriculture from the use of oil to other sources of fuel and power.

Australia, who plans a big immigration program, has announced its willingness to find homes for 17,000 war orphans from Allied lands, as part of the program.

William Clayton, U.S. assistant secretary of state, says the United States has dropped a proposal to supply France with \$140,000,000 worth of ships.

The Indian Army has won more Victoria Crosses than that of any other British Empire Army; its total now 21 VC's, next is Australia, 14, and Canada, 8.

Intensive efforts are being made to locate additional workers for the Canadian textile industry, Arthur MacNamara, director of national selective service, said.

Five middle-aged men who began bowling at Somerville, Mass., every Saturday night 25 years ago still keep up the weekly custom. Their present ages: 85, 80, 76, 74 and 69.

Preliminary estimates of International travel expenditure in 1944 indicate Canadians spent \$60,000,000 on 8,000,000 visits to other countries, while visitors spent \$112,000,000 on 13,000,000 entries into Canada.

Visit Governor-General

Army Men In Australia Received By Duke Of Gloucester

A group of Canadian Army signals specialists attached to the Australian forces visited the Australian capital of Canberra and were received by the Duke and Duchess of Gloucester. The Canadian party, headed by Capt. Oswald Forsyth of Vancouver stopped at Canberra during their transfer to a new station in Australia. They visited the impressive First Great War Memorial on the outskirts of the capital, then sat in on a session of the Australian parliament.

Subsequently they travelled to government House at Yarralumla where they were greeted by the Governor-General and the Duchess.

Question Was Costly

Archbishop Will Be More Careful When Proposing Anniversary Gift

It was a \$600 question that Archbishop Richard J. Cushing asked a nun.

The Roman Catholic prelate revealed that on a recent visit to the home of the Little Sisters of the Poor in Boston, he met one of the older nuns.

He said: "Sister, you have been here for 40 years what can I buy for an anniversary present?"

Instead of a spiritual offering he had expected, the nun asked for a potato mashing machine.

It cost him \$600.

LIFE'S LIKE THAT

By Fred Neher

ON "U" MEDICAL COURT—Mary Gallagher of Vancouver, B.C., formerly of Northern Ireland, who is the first woman to sit on the medical court at Queen's University. She was elected by the Aesculapian Society by a 95 per cent. student vote.

For Bigger Fish

Use Fertilizer To Make Plants Grow To Feed Fish

Would you believe it but they are now putting chemical fertilizers in ponds and lakes to produce larger fish, the same as the farmer plants chemical fertilizers on his lands to produce larger crop yields.

The fertilizer material does not act on the fish direct but through the plankton which is a microscopic plant that provides food for the fish and which responds to fertilizers the same as grass in pastures, according to J. E. McIntyre, agricultural agent for the Canadian National Railways at Moncton, N.B.

Experimental data to date, he said, shows unquestionably the value of fertilizers in increasing the amount of fish food and pounds of fish per acre of water surface. The more food the bigger the fish. In one lake where there were too many fish, per acre for the food available, the addition of fertilizer showed an increase in weight per fish the first summer up to two and one fifth pounds.

Amazed At Waste

Y.W.C.A. Secretary Finds Canadians Not As Careful As Chinese

Canada waste, more than anything else, impressed Estelle Amos, when she returned to Canada after five years in Ceylon as general secretary of the Y.W.C.A. "And particularly noticeable," she said, when she visited Toronto recently, was waste paper. "Paper was strictly rationed in Ceylon," she said. "I couldn't even buy an envelope without a permit. We wouldn't think of writing a letter on only one side of the paper. In stores here everything is wrapped up. I'm sure the sales girls think I am shop-lifting. I'm so used to putting my purchases unwrapped into my purse."

SALVAGED SHIPS

Only know now, it is remarkable to note that British salvage men have lifted from the bottom of the sea, where they had been sent by enemy action, 2,500,000 tons of ships, 250 ships of 10,000 tons each. Now those ships are as good as new and helping to battle the enemy and to bring supplies to the people and the armies which use Britain as a base.

Belated Recognition

Repeated Bombing Of Places In Germany Has Been Justified

As, day after day and night after night during the past three years, increasingly large fleets of bombers winged their way eastward from Britain to attack German industrial centres, many persons kept asking whether such tactics were effective. Why, they asked, if the destruction was such as it had been said to be, was it necessary to bomb the same spots again and again? There seemed little evidence that German resistance was materially weakened by attacks into which men and materials were so prodigally poured.

The answer comes now in the message in which General Eisenhower congratulates the United States Eighth Air Force and the Royal Air Force Bomber Command. The commander says that advancing troops are quick to appreciate the effectiveness with which the bombers have paved the way for them. They find city after city so systematically shattered that artillery could scarcely add to the completeness of the wreckage. In reply, Air Chief Marshal Sir Arthur Harris says that all along air men had been confident that "once our armies set foot in the ruined war industrial areas of Germany, the evidence of their own eyes would be the final arbiter of the effectiveness of these past long years of unrelenting battle." If, at times, the tone of the air force communiqués has seemed to smack of overconfidence, this can be forgiven in the light of this ocular evidence. Recognition, if a bit belated, is no less sincere. New York Sun.

A New Device

University of California Has One That Will Measure Odors

From the University of California has emerged a device which inevitably was named the Stinkometer.

It measures pleasant odors as well as offensive ones, and its creators—Dr. Otto W. Lang, Lionel Farber and Fritz Yerman—see a future for it in a broad range of manufacturing industries.

The inventors have measured the increase in odors of meats, prunes and raisins, and the loss of aroma in such items as coffee, spices, pepper, as well as in some perfumes—Business Week.

ACCURATE BOMBING

When the Americans entered Cologne they found first of all a city in ruins but the celebrated cathedral practically intact. That speaks remarkably well for the accuracy of Allied bombing and artillery fire, which consistently endeavored to protect that building.

Man In The Moon

Says Tipsy Habits Have Nothing To Do With The Weather

The slant of the new moon is practically the same for any certain month—year after year. Therefore the slant indicates the time of year. It doesn't, however, have anything to do with wet or dry weather, according to J. Hugh Pruett, astronomer of the University of Oregon's extension division.

"Some Indian tribes are said to have considered the tilt of the new moon in this way: 'When the points of the crescent extend upward, then if the string of the powder horn is placed over one of them, the horn will hang securely. Leave it there, for the moon is holding water and it will be too dry in the forests for hunting. But when the points are so inclined that the powder horn will slide off take it and go, for the woods will be wet enough to permit successful stalking of the game,'"

It is doubtful if any believer in his moon lore has ever kept monthly records of new moon tilts for a few successive years, commented the astronomer. He pointed out that, in the late winter and early spring, the crescent is almost above the setting sun so the points extend upward. Six months later the moon is well to the left of the sun, with its points in general toward the south.

An Oslo Incident

When The Populace Sighted Her Finest Son

A Nazi mob dragging a tall, upright figure through the streets of Oslo, a man with a placard round his neck bearing the words: "I am a lackey of the Jews" (Ich bin ein Judenknecht).

Passers-by stop and stare. Then a name spreads like wildfire among the crowd: "Nansen!" More than a name, the personification of Norway, her history and tradition.

Everybody realized what was going on. Odd Nansen, the architect, who had never for a moment stopped fighting in defence of his persecuted countrymen, and who had publicly denounced the expulsion of the Norwegian Jews as an outrage on civilization, was being dragged off to a Jewish labor camp.

Fridtjof Nansen's son and spiritual heir was being branded as a "white Jew", made into a laughing stock for Nazis to jeer at.

Did the people of Oslo turn away frightened, intimidated? For a second nobody moved, then one man took off his hat, others followed him. Fridtjof Nansen saluted her from his Central European Observer.

Definitely Wrong

Bored American Soldier Found Little Game Had Serious Result

For about one hour two Jims was about the happiest spot on earth.

A "walkie-talkie" army radio operator, bored in his solitary foxhole, had decided to play radio announcer with a buddy a couple of holes away. Close by, inside a truck, was another operator. From the official set in the truck came the electrifying message: "Germany has surrendered unconditionally."

Then the foxhole announcer became worried. He went to his commanding officer with a report that deserves to be added to the archives of understatements.

He said: "Sir, I think I've done something wrong."

Some of the worst garden diseases, such as root knot and clubroot, are carried on roots of seedling plants.

THE BOOK AND THE FAITH

Memory Selection: The word of the Lord abideth for ever. 1 Peter 1:25.
Verses: Psalm 145; Proverbs 2:1-9; II Corinthians 3:1-8; II Peter 1:21.
Devotional Reading: Psalm 119: 153-160.

Text Explained With Comments

The genuine Search for Wisdom is Rewarded. Proverbs 2:1-9. Dr. G. Campbell Morgan's observation that "The way of wisdom is never revealed to triflers" expresses the thought of the first five verses of this text. The wisdom sought is the knowledge of God, who is the source of wisdom. We must put effort into the intellect, and the exhortation "To apply thy heart to understanding" has been expressed as "to put your brains into it." Note the "ifs." If thou wilt receive... If thou cry... If thou seek... then shall thou understand the fear of Jehovah.

"Every Sunday School should be a place where this great book is not only opened, is not only studied, is not only revered, but is drunk of as if it were a fountain of life, as used as if it were the only source of inspiration and of guidance" (Woodrow Wilson).

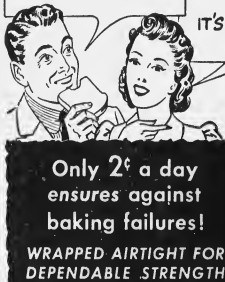

Wisdom is God's gift. The Book of Our Faith, 2 Peter 1:21. Peter here, of course, is referring by prophecy to the Old Testament, for the New Testament was not in existence at the time his Epistle was written. By the prophecies of the Old Testament was meant the entire body of Hebrew Scripture. The writers were conscious of speaking the will of God, of being impelled to write by the Holy Spirit.

The Living God, Psalm 145. The whole Psalm is a hymn of praise to God, the fountain of all good things. Verses 1-6 declare God's greatness: 7-10, God's goodness; 11-13, God's kingdom; 14-20, God's care. In verse 21, the Psalmist, who "begs to bless God as the savior, ends as part of an immense choir."

More literally, the Hebrew of verse 13 reads so we are told: Thy kingdom is a kingdom of all ages, and thy dominion is over all succeeding generations. The word "all" is a characteristic of this Psalm.

Pomegranate means "apple full of seeds," coming from the Latin pomeum for apple and granatum for full of seeds.

The first railroad in Scotland, opened in 1812, was worked by horses.

OUR COMPLETE
SHORT STORY—

Women Drivers!

By BERNARD KELLY

McClure Newspaper Syndicate

Della Walker looked up cautiously at her husband as they waited to cross the busy street. Was this the time to ask about buying that dashing ensemble at Tremont's? Bill looked happy and peaceful. A girl was it was the moment.

"Bill," she began as they stepped off the curb together, "there's the sweetest."

Bill grasped her wrist and smothered her back toward the curb, almost causing her to lose her balance. There was a blatant burn and the squeal of tires, and a powerful roadster whipped past. A girl was driving.

"Wow!" Bill roared. "Women drivers! Did you see that? If a few pedestrians happen to be in the way, does she care? No! Let 'em jump. Women drivers!"

"You ain't a wailing, brother," another man said. "There ought to be a law against women driving. My wife—"

"You put a woman back of a steering wheel," Bill said, addressing the world at large, "and it's like putting a bomb in a furnace."

Della decided that it was not the proper time to ask about that ensemble. Moodily she crossed the street with Bill and they entered their trim little coupe. "I'll drive," Della said.

"Honey, you know I'm always nervous when—"

"Oh, whale blubber! I can drive as well as you can, and you know it! Men make me sick, the way they take on about women drivers. The things I've seen men do!" Bill leaned back resignedly and Della drove away.

"Hey, look out!" Bill said suddenly. "That truck!"

"I see it. Keep your shirt on."

"Hey, that red light!"

"It's turning green. See? I saw the orange on the other street."

"Look out, you're going pretty fast."

"Twenty. If I go any slower they'll pick us up for blocking traffic."

Bill was thoroughly out of sorts. The pinnacle of his rage was reached when the driver of the car ahead signaled for a half block that she was going to make a left turn, and then went straight ahead. "You see

that?" he said as they drew up at their cozy little home. "You see that? Held her hand out for a whole block, then went straight ahead! Of all the—"

"Maybe she changed her mind," Della said.

"Changed her mind! Sure she changed her mind. Women drivers!" He picked up the evening paper and read a story through carefully. Then he smiled.

"What is it?" Della asked.

"Some scientists over at the university have invented a new machine," Bill said. "It's for testing drivers to see how good they are. How quickly they react to problems."

"How can they do that?" Della asked incredulously.

"They make a motion picture of a car moving down a city street, with all kinds of things happening: trucks crossing and kids playing ball, and so on. Well, they place the person who's going to be tested in a seat with all the levers that belong in an automobile, and flash this picture on a screen in front of him. He's supposed to put the brakes on when he thinks they should go on, or honk his horn, or turn out, and everything he does is registered on a graph. It's easy enough then to see how quickly and correctly he reacts to danger."

"Sounds complicated," Della said. "It's just what some man would work out."

"Right," Bill said, "and they'll test anybody free of charge. You and I will take that test tomorrow. Once and for all I'll show you that men are good drivers and women aren't. That'll put an end to all this arguing."

About ten o'clock the following morning Della and Bill were emerging from the laboratory. Bill's face was as dark as a thunder cloud. "You don't need to snap my head off, do you?" Della demanded, "just because the test showed I'm fifty per cent. better driver than you?" Of all the babies!

"It was framed!" Bill stormed. "Why, anybody knows men are better drivers! Everybody knows it!"

"Except the machine," Della said. "It doesn't."

"All right, all right, you drive, then," Bill snapped, climbing into the coupe. As they drove off Della sighed. That ensemble had never seemed farther away.

They were coming to a red light. Bill, scowling was slumped down beside her. Della, with a sudden intake of breath, saw a motorcycle traffic policeman biding there, waiting for the change. She pressed her foot on the throttle, and honked.

"Hey, the light's red!" Bill roared.

"Better the light," Della said, sweeping past the policeman and across the intersection. "It was almost ready to turn, anyhow."

There was a wailing siren, and the officer waved Della to the curb. "What's the idea?" he demanded.

"I'm going to give you a ticket, young lady."

"Good driver!" Bill crowed, his pleasant humor suddenly restored. "Runs a red light! Congratulations, officer. There ought to be a law about women drivers!" He accepted the ticket and tucked it into his pocket. He whistled a jaunty tune.

He smiled and waved at a passer by. Della, driving on, suppressed a quick smile. "Home," she said, "there's the sweetest little outfit down at Tremont's—"

COMMERCIAL AIRCRAFT

Second commercial aircraft to be developed from the Lancaster bomber, the Tudor I will be introduced during the coming summer. Officials of A. V. Roe and Company, Ltd., aeronautical engineers, described it as a fast trans-Atlantic plane. Nearly ready for service is Tudor II, which, carrying 68 passengers, is much larger but has not the long range of the Tudor I.

Japanese pilots were given little personal protection, such as armor plate or bullet-proof fuel tanks, in the early stages of the war.

Daring Tactics

Carried Out By Spitfire Fighters
Against German V-Bombs

The idea of matching Spitfire fighter-bombers against German V-bombs was conceived in a bleak Nissen hut by an R.A.F. fighter pilot who had long studied intelligence reports on the enemy's "vengeance" weapons.

The pilot, who remains unidentified, was convinced that V-2 was a target against which the fundamentals of dive-bombing technique could be applied. The objective was too small for the heavy bombers, but ideal for the power-diving, single-engine fighter-bomber.

A handful of Spitfire squadrons went into intensive training. Every characteristic of the weapon was studied and bombing ranges in the vicinity of the base was reserved exclusively for practice attacks of this new "priority one" offensive. To ensure the most effective type of bomb, a variety was tested.

Three weeks later, on Nov. 21 last year, the Air Ministry announced for the first time that a V-2 target had been attacked successfully by Spitfires. Direct hits were made on a storage, erection and launching installation concealed in a Netherlands wood and plots saw "strikes" on a rocket standing erect in its firing position.

Attacks against this difficult type of target, the launching site may be a small space in the streets, in a wood or on the open road, are carried out by a power dive from many thousands of feet and the bomb is released from 2,000 to 3,000 feet. Then the pilots pull out of their dives and follow up with a concentrated low-level strafing which "sterilizes" the target area and its immediate environment.

Thus the entire organization behind the launching of the V-bombs is dislocated. Spitfire attacks undoubtedly have prevented the enemy from developing his launching to the planned scale.

GARDEN NOTES

Where the Grounds Slope

Where grounds slope sharply say several feet in a few yards, experts advise making a distinct separation between one level and the other rather than trying to connect with sodded terraces. The latter, no matter how carefully handled, are liable to wash away. Most landscape gardeners advise grading lawn or grounds gently to a stone wall, rock garden or strip of dense shrubbery or tree growth. This will take up from a two to five foot drop, then the lawn is continued again at another level up to the end is reached or another drop occurs. This will take up from a two to five foot drop, then the lawn is continued again at another level up to the end is reached or another drop occurs. This will take up from a two to five foot drop, then the lawn is continued again at another level up to the end is reached or another drop occurs.

Rotation

Wherever possible gardeners rotate their vegetables from year to year. In other words, the same part of the plot will not be used for exactly the same vegetable each season. They have sound reasons for doing this, the most important of which are better insurance against disease and depletion of soil fertility.

If, for instance, potatoes were grown on exactly the same spot year after year, then there will be danger of all sorts of potato diseases living over the winter and getting worse each season. The particular plant food used by potatoes, too, will soon become exhausted. Most around even a few feet there is more protection. This also gives such soil builders as the leguminous vegetables (peas, beans, etc.) a chance to add fertility and spread it over the whole garden. Rotation also assures more thorough cultivation, for cultivation varies in depth and intensity with almost each plant. With corn, tomatoes, potatoes, etc., it is possible to keep ground cultivated deeply and continuously throughout almost the whole season, whereas with some of the smaller and closer growing things this would be impossible.

This moving around allows one part of the garden to be cleared up early and some enriching cover crop like late oats, buckwheat or rye can be planted. These are plowed or dug in next spring or late this fall. Not only will this help to rid the soil of weeds, but digging in the cover crops will add humus and plant food for next year's vegetables.

Trillion Dollar War

Before Hostilities Cease Total Will
Have Passed That Sum

The aggregate cost of the war for all belligerents has already passed the trillion-dollar mark. Currently, war costs are increasing at the rate of about \$200,000,000,000 annually. The United States has accounted for about one-fourth and Great Britain for about one-tenth of the over-all total. Data for other countries are less accurate. But one estimate for Russia is about \$100,000,000,000, while the Axis Powers are estimated to have spent about \$300,000,000,000. The balance is accounted for by China. To these direct costs must be added billions of dollars of indirect costs represented by property destruction, scorched earth, broken careers and broken lives. It is difficult to estimate such indirect costs, but in the First World War they were equivalent to about three-fourths of the direct costs incurred. It is clear, therefore, that the total costs of this war will be substantially in excess of the trillion dollar mark before hostilities cease and reconstruction is completed.—New York Times.

Synthetic Tires

Withstand Speedway Test Under The
Most Grueling Speeds

In a statement issued by W. H. Funston, President of the Firestone Tire & Rubber Company of Canada Limited, synthetic tires made by his company have successfully completed a most grueling speed test made to ascertain just how such tires stand up under high speeds.

The test was authorized by the U. S. Government and conducted by the American Automobile Association. Locale was the Indianapolis Speedway, scene of the pre-war automobile classics. Wilbur Shaw famous three-time winner of the Indianapolis race, volunteered to make the test. Driving a racing car equipped with regular tires taken from stock Shaw drove 500 miles at an average speed of 100 miles per hour, taking the turns at 90 miles and stepping up to more than 135 miles an hour on the straightaways without a single skid or blowout. Tire engineers say it is equal to 50,000 miles of ordinary driving.

This proves conclusively," Mr. Funston points out, "that synthetic tires are safe at high speeds. The test was authorized by the U. S. Government to find out what might be the result of synthetic tire performance when the war time speed limits are lifted. The results speak for themselves. However, if car owners hope to keep their cars in service it is vitally necessary that they continue to observe wartime speed limits and all the other simple yet fundamental precautions which have proved so successful in keeping Canada's irreplaceable cars in service."

Little hands and bigger ones too are as much inclined to invade the cookie jar as ever and recipes for easy-to-make, cookies are in great demand by modern mothers who still keep the family cookie jar brim full.

One of the most popular breakfast cereals—oat-popped rice, is the inspiration for this delicious drop cookie.

Peanut Butter Macaroons
2 egg whites
2 cup sugar
1 teaspoon almond extract
1 cup peanut butter
2 cups oven popped rice cereal

Beat egg whites until stiff but not dry. Fold in sugar, flavoring and peanut butter. Add oven popped rice cereal, stirring only enough to combine. Drop from teaspoon onto well greased baking sheet; bake in moderate oven (375 deg. F.) for about 20 minutes.

Yield: 1½ dozen macaroons (2½ inches in diameter).

SOVIET CONTROLS EPIDEMICS

Among the striking contrasts between Czarist Russia and the Soviet Union is the health of the population. Old Russia was notorious for its uncontrolled epidemics, particularly in times of war. During the present war it is reported there have been no epidemics in Soviet-controlled areas.

In the last war, more Russians were killed by typhus, the disease of poverty and dirt, than by enemy gunfire. Typhoid fever, dysentery, smallpox, trachoma, cholera, plague were as common as rain.

These diseases were accepted as a natural part of life. Children died like flies and so did women in childbirth. The superstitious regarded epidemics as a punishment from Divine Providence. The Soviet government began in 1918 to organize public health services. But their application on a broad scale was delayed by the civil wars and intervention which followed the World War. It was not until the beginning of the Five-Year plan in 1928 that satisfactory coverage of public health measures was begun.

It is therefore a remarkable achievement that in less than two decades the Soviet health authorities reported complete elimination of smallpox, cholera and plague, and that they brought under control typhoid typhus and other diseases that were rampant in old Russia. An article in the February issue of the American Review of Soviet Medicine details some of the methods that were used. In the Czar's army, vaccination against typhus was forbidden. The Soviet government introduced a program for regular immunization of the civilian as well as military population and at the same time established sanitation and food control.

Millions used to die every year from typhus in the old days. The 1911 war was followed by the blockade, interventions, civil war, famine, scarcity of fuel and soap and a broken down transportation system. These factors helped to spread the infection to an unparalleled extent. The Czarist regime had provided no hospital facilities for typhus patients. In 1920, among the first acts of the Soviet government was the provision of 250,000 beds for typhus patients. It set up an extensive network of stations for observation, isolation, and disinfection. Millions of pamphlets, leaflets and posters were distributed in all languages of the U.S.S.R. Hundreds of thousands of volunteers were enlisted in the war against typhus. Slogans were broadcast and "bathing weeks" instituted. The government allotted generous funds for this work and typhus has been no problem in this war.

Diphtheria and measles have received special attention by research and practicing public health workers. Both these diseases of childhood have been brought under complete control. Immunization against diphtheria is compulsory for all children between the ages of one and eight. In 1940, 10,000,000 children were immunized against diphtheria. During the war, the public health centres all over the country have conducted a program of re-immunization and research workers are searching for a more effective preparation which would require less frequent injections.

Measles used to strike at millions of children in old Russia. It no longer threatens that many. Soviet medical workers began to use anti-measles serum when it became safe and by 1937 the use of such serum became obligatory throughout the U.S.S.R. In 1940 alone, 1,241,000 children were immunized against measles. The inoculations are given free to all children. "The aim," it is stated in the Soviet health report, "is to raise the age of measles patients, and create an immunity by developing an abortive form of the disease." (The above article appeared on the editorial page of the Toronto Daily Star, March 14, 1945).

Lost Its Secrecy

Germans Published The Original
Formula Used For Making
Cologne

So famous did Cologne become for one of its products that it won a place in the dictionary as cologne, short for the perfume eau de cologne.

Actually, the scent was first devised in Italy, but its manufacture was established in Cologne in 1709 by Giovanni Maria Farina. He passed the secret on to his nephew, who handed it down to his grandson, whose descendants still make it.

Later the formula lost its secrecy when Germans published it. The original cologne was made by dissolving oil of lavender and oil of rosemary in distilled alcohol, then adding oils of neroli (from orange flowers), of lemon of sweet orange peel, of times and of bergamot (a pear-shaped species of orange), with a tincture of rose-geranium flowers to top everything off.—New York Herald Tribune.

Simple To Make

By ANNE ADAMS

Few pattern pieces to Pattern 4799. Just straight across to sew, back and front! No sleeves to set in! It all adds up to easy sewing. A cool dress, slim and flattering. Pattern 4799—Women's sizes 32, 34, 36, 38, 40, 44, 46, 48, 50, 52. Size 36, 3 yds. 35-in. 1 yd. trim. Send twenty cents (20¢ in coins (stamps cannot be accepted) for this pattern. Write plainly Size Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg, Man. Because of the slowness of the mails delivery of our patterns may take a few days longer than usual.

Giant New Ship

British Are Building One For Land-
ing Purposes In Japan

A giant new type of landing ship for use against the Japanese now is being built in British shipyards. The British information services reported last night.

(The B.I.S. said the new landing craft has a far larger capacity than any landing ship built to date and its range is also considerably greater).

All gun crews of the British navy are now equipped with gas masks which are expected to enable gunners to remain at their stations in the face of a gas attack.

PREVENT FIRE IN FORESTS

In Alberta we have a great heritage in our forests and streams. If our forests are blackened and ruined by fire, instead of forest industries supplying the building material we require and providing a living directly and indirectly for thousands of people, instead of our shady playgrounds, big game, fur bearing animals and our pleasant streams, what are we going to have? A ruined industry, roaring torrents in the spring and dry water courses in the summer, soil erosion and all the other ills that occur in any country where the balance of nature is upset by the destruction of the forest.

Some of you engrossed perhaps in making a living have not thought of this. Every good citizen, and particularly those living in or near the forests, when he understands how serious the situation may be, he will realize his responsibility to assist in preventing fires that may destroy the forest.

Your local ranger contends that a lot of good citizens live in his district. He takes this opportunity to thank you for the co-operation you gave him last year and he is sure the more you realize the situation, the more he can count on your co-operation and assistance.

NOTES AND COMMENTS

A Sewerage System

The question of installing a sewerage system in Coleman has long been spoken of, but no concerted action has ever taken place. Some may have wondered why the grounds in central school were always open. The reason is simply that the cesspools are filling up almost as quickly as they can be emptied. On main and second streets, especially in the business lot, there are two or more cesspools. Undoubtedly a sewerage system is a dire necessity in the main street area.

The only drawback to starting such a scheme at the present time is the large amount of money involved. However, no harm can be done by bringing in experts and gathering information as to the amount of work required, determining a proper disposal ground some distance from town and the expense involved. No doubt remains for the need of a sewerage system for the main streets, and as time went on, for the whole town as a whole.

Drastic Action Required

Cows dying of starvation, carcasses lying nearby the river bank from which Coleman secures part of its water supply, grounds and barns in a filthy condition—such is the report given by the Chief of Police on his findings at a ranch nearby town.

This has been a fairly mild winter and surely there was no need of livestock losses unless no proper precautions have been taken by the rancher. To see defenceless brutes dropping dead of starvation with no outside aid coming to their rescue surely must cause some local organization to spring into instant action and either alleviate the situation by themselves or cause a representative of the Prevention of Cruelty to Animals to be brought in and handle the matter.

The carcasses on the river bank, grounds and barns in a filthy state is something which citizens as a whole should demand instant action upon. Once high water comes this spring it will wash into these banks and grounds, carrying contaminated matter with it. Here is a source of contamination that can be eliminated by effective action by provincial health authorities whose attention has been directed to the atrocious conditions prevailing at this ranch.

Our Cemeteries

There are many things that Canada copies from Britain, but the care and beautification of cemeteries is most certainly not one of them. In small towns throughout western Canada, with few exceptions, the cemeteries are plots of ground which are given little if any care.

There is absolutely no reason why Coleman should adopt this attitude. We have two cemeteries which if given some care could be made into beauty spots. Some who have lost loved ones work over their graves and make them really beautiful during the summer and fall months. However, there is the lack of concerted effort. We have no clearly defined roadways. Large rocks and piles of soil and gravel lie indiscriminately all over the place. Our fences should be replaced. The road leading to the cemeteries should be improved, or better still, a new road should be made into the cemeteries, as the present one is too steep and rough. Just because other towns pay no attention to their cemeteries is no reason why we should follow their example. Let's stand on our own feet and have council include cemeteries' improvements in its yearly budget. Improvements can be made over a period of years.

Victory Soon

How long can it last? is the question on everyone's lips as they listen intently to the news of the Allied armies unstopped sweep through Germany, of huge troops being sprung in the Ruhr and Holland where uncounted thousands of Germans are virtual prisoners, soon to be placed behind barbed wire or killed in their hopeless struggle for world domination.

Germany is now a country lacking government, political or military. Her citizens are milling about in hopeless confusion as her armies seek to escape Allied might. Her towns and cities are being blasted to rubble by super bombs and shells, human lives are being snuffed out by the thousands daily. Her defeat is complete, yet she is powerless to stop this massacre, as no group seems to possess the power to rise, take control of the domestic situation and say "we surrender." Certainly Hitler is not expected to do so, for it simply means that he would place the hangman's noose around his own neck, and a mass murderer such as Hitler will be the last man to sign his own death warrant.

Late Spring

Snow along with chill winds are combining to make this a late spring. Gardeners are "champing at the bit" at being unable to get out into the gardens and plant seeds and bulbs. Some will get a head start by growing some plants indoors and transplanting once the milder weather arrives. The past several years has witnessed added interest being taken in local gardens and some beautiful gardens can be seen at the peak of the growing season. The youth of the town should also be encouraged to interest themselves in gardening. Parents are in the best position to encourage this interest.

The Churches

ST. ALBAN'S CHURCH

Rev. W. E. Brown, Rector

Daily offices:

Mornings 9 a.m. Evensong 7.30 p.m.

The first Sunday after Easter:

Holy Communion 11 a.m.

Young people's service 2 p.m.

Altar flowers given Easter day

by Mrs. W. L. Borrows, Mrs. W.

H. Garner in memory of Fred

Slugg, Mrs. J. C. Richards in memory

of Dulcie, from the Rectory in

memory of Clayton Brown.

There were large congregations

at the Easter Day services in St.

Alban's church. The services were

inspiring and most helpful. The

carpenters are now making some

necessary repairs in the basement

of St. Alban's. The interior will

receive some attention in the very

near future. St. Alban's Ladies

Guild are to be congratulated on

the outstanding success of their

social on Monday evening. The

Rector wishes to thank them and

all who patronized. The Archbishop

of Kootenay has asked the Rector

to visit Fernie and Michel on Sunday,

April 15th.

ST. PAUL'S UNITED CHURCH

G. A. Kettys, Pastor

Sunday, April 8—

Morning service at 11 a.m.

Sunday school at 12.15 noon.

Evening worship at 7 p.m.

You are cordially invited.

The pastor and congregation of

St. Paul's wish to express their

sincere appreciation of the very

fine service of song which was given

by the senior choir at the morning

service, and by the junior choir at

evening worship, on Easter Sunday.

Reception Service

At the reception service held in

St. Paul's on Sunday morning,

four of our young people were

welcomed into the membership of

the church. They were Victoria

Cibulsky, Isabel Ewing, Norma

Liesemer and Audrey Root.

Baptisms

On March 28, at the manse,

Audrey Myrtle Root.

On March 30, at the home of
the parents, Victoria Cibulsky and
Roy George Cibulsky.On Sunday, April 1, in St. Paul's
United church, William John, infant
son of Mr. and Mrs. Wm. J.
Mosell; Karen Elaine, infant
daughter of Mr. and Mrs. Wm.
Kennedy.

THE SALVATION ARMY

Captain and Mrs. T. Smith
Sunday services—
11 a.m., Holiness meeting.
2.30 p.m., Directory class.

Cigarette Fund Notes

Dear Sirs: I wrote a letter previously stating I had received 300 cigarettes. I received the other 600 mentioned in your letter a few days ago. Much of the confusion has been due to the fact that you have been misinformed of my number and rank. Thanks a million.—John Galding.

Dear Sirs: Just a line to thank you ever so much for the February issue of Sweet Caps received a few days ago. I am fine after having a bad cold for a few days. We have been very busy lately and I have had quite a time trying to answer all my letters. I surely appreciate receiving the smokes you send and they always seem to come just when I have or am about to run out of them. Best wishes to all.—Archie Wragg.

Dear Friends: This is just a brief letter to say hello and trust that everyone is fine at the moment. I am down visiting Jim Lloyd and as I owe you a letter this is a good time to write for both of us and to say that Jim and myself are in good health and are trying to enjoy ourselves under the circumstances.

Right now in this part of Italy we are experiencing spring-like weather and after all the rain, wind and snow flurries of the past two months it is really appreciated. However, let's hope come next spring we can all be back in Crows' Nest and see the crocuses and pussy willows budding forth. News is very scarce and we don't hear much of what is going on back home so we are at a loss on what to talk about. Had a letter from "Suzie" Caroe about a week ago and he was getting on just fine. He was still in transport so I presume he is being kept fairly busy.—Herman Hirsch and Jim Lloyd.

Dear Friends: Just received 300 caps again today. Hope you have received the letter Jim Lloyd and myself wrote last week. Right at

this moment I'm down visiting Jim and he is brewing up a "spot" of tea. We are both fine. —Herman Hirsch.

Dear Sirs: I have just received your gift carton of 300 Sweet Caporal cigarettes. Your kindness and remembrance is very much appreciated.—L. T. Hoyle.

Dear Sirs: Received smokes OK. Thanks again. Am well. Should be seeing you this year. Happy days. Best regards to all.—G. Burtnik.

Oliver writes Max Stigler: Max Stigler received a letter from Oliver Barringham this week in which he states that he had spent six months in France, Belgium and Holland and was now back in England, much to his regret. He had received his Xmas parcel of 600 cigarettes and conveyed his thanks to the union. His mail was slow catching up with him and he was losing track of Coleman news. He sent his regards to all his friends and hoped to be home soon.

Dear Sirs: I received your parcel of cigarettes a few days ago for which I thank you. Your cigarettes come like the dawn after the dark. Everything is fine here.—J. Kutsky.

Dear Sirs: Received two lots of cigarettes last week and thanks a million. Cigarettes are most welcome and are really appreciated and are one of the gifts looked forward to each month.—John Kulig.

Dear Friends: Received 300 of your cigarettes a few days ago. Thanks ever so much. Also received the parcel from the Ladies Auxiliary a couple of weeks ago and would like to take this opportunity of thanking the ladies as I really enjoyed the contents. Have failed to date to meet any of the boys from home.—H. Eysackers.

Dear Sirs: I received your gift of 300 cigarettes for which I wish

to thank you very much. Over here they are better than gold. I can't express my real appreciation in words so I hope you will understand when I just say thanks a million.—A. D'Andrea.

Dear Sirs: Sure nice to get your carton of cigarettes today and they were certainly welcome. I had not had a smoke of Canadian cigarettes since I arrived here and did not enjoy these English cigarettes at all, so thanks a million. I am getting used to the climate and people over here and do not find it too bad. Have had a couple of short leaves and gone on sightseeing and have enjoyed that and intend to see a lot more if I get the chance. Have only met one of the former Coleman boys over here so far and that was Malcolm Fraser. You may remember him.—M. Cornett.

Dear Members: Just received another parcel of 300 Sweet Caps and would like to extend my sincerest thanks to the club members and all the people who are doing a grand job in keeping up the regular flow of caps to the fellows over here, from Coleman. They are always looked forward to and certainly appreciated. Keep up the good work and best of luck to all.—O. Hirsch.

Dear Sirs: Many thanks for the 300 Sweet Caps received just the other day. They are as always very much appreciated. I have been fine until the past few days of which I have had a bad cold. We have had lots of rain again lately and it has melted away the snow so we are back in the mud again. Hope you are having a mild winter back home. The way the Russian army and the western front is going now the war will be over soon I'm sure. They are sure close to Berlin, aren't they? It will be grand to get home again. Thanks again and best regards to all my Coleman friends.—Archie Wragg.

Dear Sirs: Received another 300 Winchester cigarettes. They had been to Holland and I don't know whether this shipment and the last

300 make up the Xmas shipment or not, but I believe it does. I am getting along fine. The war news is good these days. Let's hope it's over soon.—Oliver Barringham.

Dear Sirs: Received your shipment of 300 cigarettes. Sure came in handy over here in Germany. In fact that is where we need them most. Hope to be seeing you all very shortly because by looks of things it sure won't be long before it's all over. Thanks a lot and also to the people who make these gifts possible.—Pete Smith.

Dear Sirs: Your package of smokes arrived in good shape. Thanks a lot. Met young D'Andrea from Coleman a couple of weeks ago. Good to see someone from home again.—C. Murphy.

Dear Sirs: I wish to acknowledge receiving the ever welcome parcel of 300 Sweet Caps in last night's mail. I had my leave in dear "Old Blighty" and spent a grand time. To mix with people and converse in one's own language was a change after being in Holland. I am not discrediting the Hollanders as I have made many swell friends and whom I hope to correspond with once I return to the land of the Maple Leaf.—John Howarth.

Hello Friends: Received the cigarettes. Thank you and the Coleman people for the good job they are doing for the boys over here.—Ugo DeCecco.

Dear Friends: Received another shipment of your cigarettes yesterday. Have been reading in The Journal about some of the work you are doing. More power to you. Hoping to see you soon.—H. Eysackers.

Dear Friends: Thanks once again for your welcome gift. Things are looking quite bright these days and maybe it won't be long before we are all home again. Give my regards to all the members of the Legion. This organization will be one of the bright spots after the war.—E. Derbyshire.

**THIS IS AN OFFICIAL STATEMENT
BY YOUR GOVERNMENT ABOUT**

COAL

This year the mines must be kept working during the Spring and Summer. Unless they get a steady flow of orders, they will lose their miners to other employment. It is absolutely imperative that the miners keep at work in the mines.

The transportation situation also is likely to become serious. The railways are now in a position to haul coal from the mines to the dealers' yards, but later will be busy hauling grain.

The coal dealers have had difficulties this past winter with delivery labour, and if they are to deliver all the coal required by their customers, it will be necessary to keep their employees busy every working day in the year.

So that your dealer may do his part in keeping the mines busy during this war emergency, get him to fill your bin as soon as possible.

This picture of an anxious group of London citizens is taken from a moving picture film, "V-I," which will be shown in many rural areas of Canada as part of the Eighth Victory Loan program. The film shows this group of men digging

into the wreckage of homes destroyed just a short while previously by a robot bomb. As they work they hear and see another of these vivid picturizations of death approaching. Note the intense anxiety in the faces of these workers as

they speculate whether or not the robot will stop and fall as it reaches them, or will pass on to another target. The film is one of the most vivid picturizations of robot attacks in England which has been produced.

Flying Mate Tells How Fernie Dickson Died

Sgt. Dickson, Former Coleman Boy, Shot Down Three Planes Before Being Fatally Wounded October 14, 1941.

Many citizens remember Fernie Dickson, son of Mr. and Mrs. George Dickson, formerly of Coleman and for many years now residents of Vancouver. Fernie attended school here and is still well remembered among the young people of town.

While at the coast he enlisted in the RCAF, graduating as a rear air gunner. He went overseas and on Oct. 14, 1941, his birthday, received wounds that proved fatal. He is buried in Belgium.

It was only last Christmas that a member of his crew, Eddie Carroll, came into possession of Mrs. Dickson's Vancouver address and wrote the following letter:

"Corner Cottage," Lodge Lane, Westerham, Kent.

My dear Mrs. Dickson:

I have just come home on a few days leave, to discover awaiting me on arrival the parcel you sent for Christmas. I thought it most sweet of you, and thank you very much indeed for the kind thought behind it.

Also, I was so pleased by the

parcel, to discover your address, as ever since I returned from the continent, I've been wanting to write you just a few lines to let you know all I do about the whole tragic affair—if you don't already know about Dickie.

As you know only too well, he was our rear-gunner—and a very good and alert rear-gunner he was, too. When we joined the squadron, it was not long before many of the captains were trying to get him into their crews—both for his spirit and ability. His uncanny eye for firing was proved time and again, when we used to go up on air-firing before we started operating. However, it was during his last operation which I want to tell you most, for, had he returned to this country, without a doubt he would have been awarded the DFM for his action under fire, and complete disregard for his own life. When I returned I did my utmost to obtain the same for him, but the powers that be informed me that the only posthumous award which can be awarded was the VC, and to me, I think that is very unfair.

Whilst over enemy territory it was Dickie who first informed us that we were being chased by enemy fighters, and it was he who was responsible for shooting three of them down—but unfortunately, the last one he got, got us first, but if it is any consolation at all, I can assure you that he got the one that eventually brought us down, although the RAF only gave us three probables. I discovered on landing that three had crashed in the vicinity besides ourselves.

As for myself, since returning I have done a tour of operations on night fighters without, I'm afraid, very much success, but hope shortly to be returning again, this time to Spitfires, however, we shall see.

The recent news from all fighting fronts possibly makes some people think it is too good to be true, but how else can the outcome result, when we have, fighting on our side such courageous and determined people as Dickie.

Yours sincerely,
Eddie Carroll.

Cigarette Fund Notes

Dear Sirs: Thanks once again for cigarettes received today. They sure are a welcome sight and believe me whole heartedly appreciated.—R. McMullen.

Dear Friends: Received you 300 c's quite safe and was very pleased to receive same. I am feeling fine. Have spent some time with Herman Hirsch lately and it is sure nice to have someone from home to talk to.—Jim Lloyd.

Dear Sirs:

For about two months now I have been contemplating writing you, but somehow it has never matured into any more than an idea. I just came back off leave and found a letter awaiting from my old mid upper gunner who is back in the land of the maple and being married soon. The bomb aimer married over here recently and hopes to be on his way to Canada and civvy street. I guess when they were dishing out luck and brains, I was absent. Anyway, I am quite

happy in my own small way, so that's a consolation. We have a couple of former Colemanites here, PO Naylor and PO McDonald. I also ran into a kid from Blairmore, Henry Koentges. His folks run the tourist camp in Blairmore. He was on his way back home. We have the war pretty well in hand now over on this side of the pond, but it is pitiful to think of good men laying down their lives in the front lines when the Hun must be convinced he can hardly win. I am still going strong and hope to be for a long time to come. I have decided to see victory on both this and the Pacific theatre before I venture back to civvy street again, much as I would like to live my own life the way I want to live it. I am sure I would never be happy unless I was assured that all wars are over for at least another generation to come. I almost forgot to thank you for the carton of cigarettes I just received from you. My mail was rather slow in coming through here, but seems to have picked up now, I hope. Wishing you all the best and still hoping to see you all some day.

Ever, Tex.

HE DID IT

Somebody said that it couldn't be

done. But with a chuckle replied That "maybe it couldn't" but he would be one Who wouldn't say so till he'd tried.

So he buckled right in with the trace of a grin

On his face. If he worried he hid it.

He started to sing as he tackled the thing That couldn't be done, and he did it.

Somebody scoffed "Oh, you'll never do that;

At least no one has ever done it";

But he took off his coat and he took off his hat,

And the first thing we knew he'd begun it.

With a lift of his chin and a bit of a grin,

Without any doubting or quiting, He started to sing as he tackled the thing,

That couldn't be done, and he did it.

There are thousands to tell you it cannot be done,

There are thousands to prophesy failure:

There are thousands to point out to you one by one,

The dangers that wait and assail you.

But just buckle in with a bit of a grin,

Just take off your coat and go to it;

Just start to sing as you tackle the thing That "can't be done" and you'll do it.

WORKING FOR WAR — PREPARING FOR PEACE

No. 6 IN A SERIES

THE MIRACLE OF WARTIME PRODUCTION IN ALBERTA

OVER 73 MILLION DOLLARS IN POULTRY

and 192,321,726 dozen eggs 1939 to 1945

EGGS for our fighting forces! EGGS for Britain! EGGS for the meals of our home-front workers! This essential element of a healthy diet is being produced—and processed—in ever-increasing quantities by Alberta's growing poultry industry in response to urgent war demands. JUST IMAGINE! Nearly Forty Million Dozen eggs in 1944—over SEVENTY-FIVE dozen per minute, to mark up another record-breaking production figure for Alberta! At present market prices, this represents approximately **TEN MILLION DOLLARS** per year to poultrymen and farmers, plus an additional **EIGHT MILLION DOLLARS** in revenue from dressed poultry sales. A substantial percentage of Alberta's poultry products is processed right here in the Province for export to the Battlefronts and to our Allies. One Egg-powdering plant alone processes 300,000 eggs per day and employs an average of Sixty persons. Thus, poultry is not only making an important contribution to proper nutrition and health on many fronts, but is building a place for itself in the economic fabric of this Province.

Free copies of a booklet containing the entire series of informative details on Alberta's Wartime Production may be obtained at the conclusion of the schedule. Please send in your name to Calgary Brewing & Malting Co. Ltd., Calgary.

STATISTICS

Yearly wartime market value

| Year | Value |

"Be Proud You Live in Alberta"

A PUBLIC SERVICE FEATURE PRESENTED BY THE MAKERS OF

CALGARY
Ginger Ale

CALGARY BREWING & MALTING CO. LTD. ESTABLISHED IN 1892

Artist Craftsman Repairs Silver

IN CONTRAST WITH THE HEAT, clangor and din surrounding the leather-aproned smith in the railway blacksmith shop, Ernest Rose, above, Canadian Pacific smithy for the past 12 years, goes about his work in a white smock and cap in the comparative quiet of his turret quarters in the Royal York Hotel, Toronto.

Mr. Rose is a silversmith, and as illustrated here, his work-a-day tasks consist of reconditioning the thousands of pieces of silverware and flatware used by the Canadian Pacific Railway Company in its hotel dining rooms and restaurants.

Scratched and dented teapots, cream jugs, viand platters and battered spoons are "meat" for Mr. Rose and his staff who take pride in their ability to stack their combined skills against the most disreputable looking piece of silver and turn it out looking like new. Under his Aladdin's lamp he has repaired an average of 1,500 pieces of silverware and some 15,000 pieces of flatware a year.

RENEWAL OF UNEMPLOYMENT INSURANCE BOOKS

To All Employers:

All Unemployment Insurance Books for the year ending March 31st, 1945, must be exchanged for new books.

Kindly communicate *immediately* with the nearest Employment and Selective Service Office if you have not already exchanged your employees' books.

There are severe penalties for failing to make Unemployment Insurance Contributions for your insured employees and for failure to renew the Insurance Books as required.

To All Employees:

If you are an insured person protect your benefit rights by seeing that your Insurance Book has been exchanged.

Soldiers' Letters

Dear Friends:

Just a few lines to let you know how things are out here in the Jungle. I sure never thought I would finish up in this part of the world, but war does strange things. Life out here is rather grim at times, but we have a swell bunch of fellows—all Canadians—so we share and share alike, so things sometimes turn out o.k. Still it is not like home. At present the weather is getting real hot, so we wear very little and are a real sun-burned crowd—it would be very easy to mistake some of us for the Burmese natives. The housing is very primitive, as we live in grass huts (bacha's) and must sleep at night beneath mosquito nets, otherwise we would be eaten alive by "mosies," bugs or snakes, but we always manage to carry on, as you may have noticed in the Canadian press. Lately they have given some news of the records set by the two all-Canadian squadrons in the Far East. That means our outfit. At present I am on active operations against the Japs and have made many journeys to the front to see things for myself. I have seen plen-

ty Japs, most of them in rather poor condition to return to Tokyo. There are very few prisoners taken, and jungle warfare can be very tough at times. Now we really have the Nips on the run and before long will chase them right back to Tokyo. I managed to get a complete collection of Japanese invasion money from one of these yellow rats who won't have to worry any more. He was a sniper some of our boys had caught up with. So I am sending these little souvenirs back to Coleman. They may be of interest to collectors of coins, etc. Should they prove to be of any value to anyone, you may be able to enrich the kitty of the Cigarette Fund by a dollar or so. Anyhow, do as you think best with them. Now, Friends, this seems to be about all, as we can not write so very much. Anyhow, very little seems to happen out here, so I send regards to all my friends, and hope to be with you all again some day.

Yours sincerely,

George F. Sims.

Enclosed: Rupees 10, Rs 5, Rs 1, Rs ½, Rs ¼, 10c, 5c, complete set of Jap invasion money for Burma.

RENEWAL UNEMPLOYMENT INSURANCE BOOKS

Two and a half million unemployment insurance books, covering insurable workers all across Canada, will expire on March 31 and must be exchanged at that date.

It is the obligation of every employer to arrange with the nearest local employment and selective service office for the issue of new books for his employees. Persons who are insurable under unemployment insurance are advised by the Minister to protect their benefit rights by seeing that their insurance books have been exchanged. Unemployed persons, or others who have their insurance books in their own possession, are to apply for new books for themselves.

The Unemployment Insurance Act provides penalties for failure to apply for renewal at March 31, and for failure to turn in expired books.

When the current renewal has been completed, the Unemployment Insurance Commission will have almost ten million expired insurance books on file—including all which have expired since the Act came into force at July 1, 1941. When

the expiring books are turned in at local offices, they go to the nearest regional or district office for "processing," that is, for the compilation of a record of contributions paid in on each insurable worker. After the books have been "processed" they are forwarded to Ottawa, where they will be retained as long as they may be necessary to review the contribution record of any worker. Under the Act, a worker's benefit rights are influenced by his or her contribution record during the previous five years.

Unemployment insurance officials state that the number of workers losing their books in the course of each year has been very small in proportion to the number of books in use at any one time. They add that it is difficult to make allowance in the record for lost books, especially if the worker does not know his insurance number.

IN MANY WAYS BETTER THAN

● Managing a farm is in many ways similar to managing any other business. That is why reserve savings in liquid form are so helpful to a farmer.

Victory Bonds provide the handiest form in which savings can be kept with safety. Their security is without question. They represent money owing to you by the Dominion of Canada, just as dollar bills do. And... better than dollar bills... they earn interest for you every day you hold them; even when put away for safe keeping in a bank vault or in a safe. They pay double bank interest.

You can get cash for Victory Bonds if you need cash in an emergency. Any bank will buy them from you. You can borrow on them, without any formality. Simply take them to any bank and get the loan you need. The interest the bonds earn pays a large part of the bank interest on the loan.

So, realize this fact, Victory Bonds are better than cash because they earn interest.

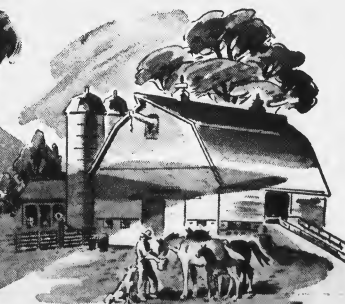

Buy Victory Bonds to have cash where you need it, when you may need it. Buy Victory Bonds to help maintain your country's war effort.

You will want cash if you plan to improve your home when the war ends...

You will want cash if you plan to improve your live stock...

You will want cash if you plan to build new barns or install new barn equipment...

History In The Making

WE ARE LIVING in troubled and difficult times, but this is also a momentous period in history and it is our privilege to witness the shaping of events of tremendous importance. Many such events have occurred during the past few years, and there will be many more before the final ending of the present world crisis. In our time we have seen nation after nation overrun and life and property destroyed on a scale never before dreamed of. We have seen the development of air warfare, and the introduction of rocket bombs and jet-propelled planes. We have likewise witnessed the beginning of tank warfare on a gigantic scale and our radios have brought to us the thunder of the powerful explosives used in modern combat. Through the press, radio and motion pictures we have become familiar with the faces and voices of most of the notable personages of the day, and by means of these mediums we have been able on many occasions, to see history in the making.

Liken Hitler To Napoleon

Hitler's attempt to overrun Europe has been compared to Napoleon's conquest of that same continent over a hundred years earlier. Napoleon changed the map of Europe many times, and much history was made during his lifetime. Some observers, however, have drawn attention to the fact that while much has been written of political and military events during the Napoleonic era, the invention of the steam engine, which influenced the course of history, has had a more profound influence. It has been suggested that a similar situation exists today, and that we may now be on the verge of as great a change as the industrial revolution of the nineteenth century. But at this time the change may be connected with science and technology, and it may have wide effects on both our economic and social relations in the future.

Many Changes Now Imminent

One reason for believing that many changes are imminent is based on the great advances which have been made in the production of synthetic materials. Some of these products now surpass the natural substances for which they substitute, for in the factory a unit of this is in the production of synthetic rubber, which is believed likely to prove superior to that made from the rubber plant. In addition, synthetic rubber may be produced close to great industrial centres, eliminating the cost of transporting natural rubber long distances. The effect of developments such as these on the economic and social structure of countries who have in the past produced large quantities of raw materials will be very great, and vast changes will be necessary to meet this situation. In the field of technology, we are reminded that in the interest of speeding up war production the Allied Nations have pooled all their technical knowledge, and that many nations who formerly imported great quantities of manufactured goods, will now be equipped to supply their own needs. Keeping these facts in mind we may question whether all the history which is being made today is originating on the battlefields and around conference tables.

HOW YOU CAN GET QUICK RELIEF FROM SORE, PAINFUL PILES

Most people seem to think the only way to get relief from hemorrhoids is by surgery. But Hem-Roid is a new, revolutionary treatment that gives you relief in minutes. You can easily see why such a simple treatment will not cure the cause of your piles. No lasting freedom from pile misery can be had unless the cause of the trouble is corrected. Pile surgery does this. But Hem-Roid is the only way to get lasting relief in to treat the cause of the trouble. Hem-Roid is a formula that has been used to cure piles for thousands of years. It is a small, highly concentrated, tablet, easy and pleasant to use. This revolutionary, compounded, tablet formula dissolves in the rectum, its medical action to relieve the congestion that is the real cause of your piles. Hem-Roid promotes free, easy and comfortable bowel movements, quickly relieves itching, irritation and soreness and stimulates better blood circulation in the lower bowel. With good blood circulation in the

lower bowel the painful pile tumors soon get rid of their cause. Hem-Roid is a real relief. Hem-Roid today from your drug store. Hem-Roid is directed for ALL TYPES OF PILES. At the end of that time if you are not cured, your money will be refunded. Hem-Roid is the most effective, most effective, pile treatment you ever tried. Return unused portion of the package to your druggist and he will promptly refund your money.

NOTE: This generous offer is backed by a reliable firm doing business in Canada for a good many years. Hem-Roid must help your pile condition quickly, easily and pleasantly or this simple, easy test costs you nothing. Try it today.

Posed by a Professional Model

Rather Crowded

Family Of Eleven Occupied Drawing Room On C.N.R. Train

The old woman who lived in a shoe had nothing on the mother and father who boarded a Canadian National Railway train at Prince Rupert for a trip to Alberta. When the conductor made his rounds to collect the tickets he nearly fainted. Eleven members of the family, parents and nine children, occupied the drawing room the father had previously reserved. No report was received as to how they bedded down at night.

ACHE? PAT ON SLOAN'S LINIMENT

War-time Clothing

People In Britain Have Learned To Make Anything Do

The story of British opportunism never contained a more astonishing chapter of "recovered situations" than the one which British women have written in wartime clothing. Many a proud husband in a fine suit to work, proud still, has gone off made of the kitchen curtains. Most husbands wear Joseph's coats of many colors, the heroic last stand of five other shirts.

There was a wedding the other day at which the bride's family and all the wedding guests in the know beamed on the bride with more than customary interest, for she was radiantly beautiful in the family tablecloth—the best damask tablecloth unstarched and made over—Providence Journal.

First "greenhorns" were persons in France who had to wear green horn-shaped hats to signify that they were bankrupt.

Price Control And Rationing Information

Q.—Has the butter ration allowance been increased?

A.—On April 1st each butter ration coupon will be good for seven ounces of butter. Butter coupon 104, originally scheduled for May 3, will be advanced to April 26, so that a butter coupon will become valid each Thursday during April. None of the butter coupons in ration book five have expired.

Q.—Must discharge papers be presented before new ration book can be issued to a former member of the armed forces?

A.—Discharge papers or letter from the Commanding Officer certifying to the discharge or a release certificate from the R.C.A.F. must be presented to Local Ration Boards before a ration book can be issued.

Q.—I am renting three rooms from the owner of the house. Can she give me notice to get out so her daughter can occupy these rooms? Also, can the landlady give notice or must she have a letter from the War-time Prices and Trade Board?

A.—The landlady has the right to give you notice if she wishes to rent the rooms to her mother, father, son, daughter or daughter-in-law. She must, however, give you six clear months' notice in the proper form provided by the Rentals Administration of the Board.

Q.—How long may I reside in a hotel before surrendering my ration book?

A.—Fourteen consecutive days.

Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book in which you keep track of your selling prices, mentioning the name of this paper to the nearest War-time Prices and Trade Board office in your province.

French Reconstruction

Will Rebuild Town On Ideas From America

Reconstruction of the devastated regions of France will be based on American experiments with community housing, according to Pierre Bardet, general secretary of the French City Planning Society (Société Française d'Urbanisme). The new homes and buildings will be built to last, Bardet claimed; they will not be temporary structures.

"For the last quarter of a century the United States has practically abandoned skyscraper construction for buildings of four floors," Bardet stated. "The technique across the Atlantic is that of the neighborhood unit, with accommodation for around 5,000 persons.

"We plan to rebuild our destroyed towns on the neighborhood unit system," said Bardet, adding the claims that France will be the first country in Europe to carry out such a project in a large scale.

Bardet stated that there would be no question of these homes and shopping centres being built as temporary housing for homeless Frenchmen. "We will build immediately, trying to avoid aesthetic, expensive and jerry-built houses, and we will build them to last. Bardet said that local construction technique and materials would be used, and added that regional architectural styles would be taken into account when the buildings were designed.

A Good Suggestion

To Make Area Around St. Paul's Cathedral A Remembrance Garden

An Empire war memorial in the bombed area around St. Paul's Cathedral, which might become one of the wonders of the world, has been suggested by Lord Queensborough, president of the Royal Society of St. George.

"There could be a temple of remembrance wherein the names of the dead could be recorded and about it might spread a garden of remembrance which would be an oasis of peace and quietude for all time to come," he said.

ROCKET ON EXHIBITION

A scale model of a German V-2 rocket, shaped like a pencil and as long as a telephone pole, has been placed on exhibition, and Londoners are paying sixpence (about 10 cents) a look to see what kind of weapon Hitler has been hurling at them. Proceeds go to a fund for relief of families of R.A.F. fliers killed in the war.

The British house of commons once adjourned to see 11-year-old William Betty, boy prodigy, play in Hamlet. Betty could master the heaviest Shakespearean parts with ease.

A bee usually gathers pollen from only one kind of flower in a single day.

The New Memorials

Should Be Of More Useful Type Than Last Ones

The question of memorials for those who die in this war was raised in the House of Lords recently, and the general view was that they should take a more utilitarian form than the memorials of the last war, probably parks and open spaces and buildings for community use.

Many of the last war memorials were hastily erected and ill-designed, and unworthy of the sacrifices they were intended to commemorate. In small places it was possible to carve the name of every man on the memorial, and in some others memorial books were printed or inscribed. It is doubtful that the stone memorials bearing the names of the dead will be adopted to the extent that they were after the last war, but the men who have died should be recorded on a plaque, roll of honor, or in a book.

The subject will soon become an issue in every community. There is always a need for a local improvement of some kind, and we are inclined to think that the utilitarian, or useful type of memorial will find most favor. Men who died in order that this shall be a free and better world would feel that they had also done something for their home town and friends if their sacrifices were remembered by adding something to the community which made it a better place to live in than when they marched away to die for it.—St. Thomas Times-Journal.

Scared Of Helicopter

Two Marooned Fishermen Terrified By Weird Rescue Machine

Two Olean, N.Y., fishermen, marooned on a mushy and sinking ice floe in Lake Erie, heard a strange noise in the sky and looked up at the most terrifying sight they ever saw.

A whirling contraption that looked like an upset windmill was settling down on them from the sky. They saw a figure inside it and thought it was the angel of doom.

The machine came to rest in mid-air a few inches from their heads and the voice inside called on one of the two hudding men to climb aboard. The two fishermen, Arthur C. Johnson, 47, and Walter Gillison, 38, edged away in fright.

"You'd have thought they were seeing something straight out of their kids' comic books," Floyd Carlson, Bell Aircraft Corp. test pilot, who rescued them in an experimental helicopter plane, said later.

One of the fishermen told him, "Why, I never expected to see one of these things, let alone ride in one."

New Solar Houses

Are Pleasant To Live In And Easy On Fuel

In some places on this continent architects deliberately plan houses to trap the sun's rays. They call them "solar houses." They can be as modern as you like, with white walls of glass. Or they can be traditional houses, simply with extra, regulation windows in the south wall. They are becoming popular because they are pleasant places to live; and for a good, practical reason, too; because they save on heating bills. Actual experience shows that on sunny days the heating plant can stay off for some hours in a house that borrows heat from the sun. The saving in fuel bills is a quarter to a third over a regulation house of the same size.

You need to think about a number of things when you plan a solar house. First of course, windows have to be banked to the south. You can also have plenty of windows east and west. But to the north, where there's no sun, it is wise to have as few windows as possible. All this means that the rooms of your house need to be arranged so that the living quarters turn to the south, and less important areas on the north. Brandon Sun.

A NARROW ESCAPE

An 18-month old secret of the war in the Mediterranean has been made known in Rome that Britain's 30,000-ton battleship Warspite received a direct hit from a German bomb and nearly sank off Italy's Salerno beaches in September, 1943.

Here's a SENSIBLE way to relieve MONTHLY FEMALE PAIN

Lydia E. Pinkham's Compound not only helps relieve periodic pain but ALSO accompanying nervous, tired, haggard feelings when due to functional monthly disturbances. It's one of the most effective medicines for this purpose. Pinkham's Compound helps natural body balance. Try it!

Lydia E. Pinkham's VEGETABLE COMPOUND

Java has more thunderstorms than any other country in the world.

HERE'S MY FEED PROBLEM

Can proper feeding prevent worms and what are some of the symptoms of worms?

HERE'S THE ANSWER

Worms cause poisons leading to blindness, loss of weight, lameness and general run down condition. "Miracle" Growing Mash will help to build resistance to disease because it contains scientifically balanced food values which give the hen the elements necessary to build strong, healthy bodies.

ASK FOR "MIRACLE" FEEDS!

Seeds 'For Russia

Under Lend-Lease 20,000 Tons Have Already Been Delivered

The Foreign Commerce Weekly, official organ of the Department of Commerce, reports that 20,000 tons of seeds, a quota set for the first half of this year under lend-lease, have been delivered to Russia. These are mostly seeds of vegetable and field crops that will permit increased planting in the liberated Ukraine.

Some indication of what the shipping of seeds means in conservation of space for other munitions than food appears in the publication. It says that the 20,000 tons of seeds could be carried by two cargo ships on one trip but that it would take thousands of ships to carry the food which these seeds can produce.

To make a point it says that one pound of tomato seeds may yield 160,000 pounds of tomatoes; a pound of carrot seed, 20,000 pounds of carrots, and a pound of cabbage seed, 200,000 pounds of cabbage. New York Sun.

SMILE AWHILE

"I have a note from your schoolmaster in which he tells me that you are last in a class of thirty boys, Tommy."

"I'm sorry, Dad, but it might have been worse."

"How could it have been worse?"

"It might have been a larger class."

Mr. Thompson—"I'm convinced that China needs a firm hand."

Mrs. Thompson—"I've told the new maid that, but it's no use."

Customer—"Why don't you advertise?"

Brushville Storekeeper—"No, sir! I tried it once and it pretty near ruined me."

Customer—"How was that?"

Storekeeper—"People came in here and bought dear near everything I had."

"Are there any good substitutes for butter?" asked the newly married lady.

"Well, yes," replied the nearest market man, "there are three: peanut butter, margarine, and going to mother's house for dinner."

During a severe frost a young woman entered a chemist's shop and asked for a remedy for chilblains.

The assistant recommended a certain preparation, which he said was warranted to keep away chaps.

She said it was not the kind of thing she wanted.

Teacher (to the class): "Now this is a very difficult problem. Watch the board while I run through it."

Sweet Young Thing (If the Dean doesn't take back what she said this morning, I'm going to leave college).

Another Ditto—What did she say?

Sweet Young Thing—She told me to leave college!

Ann—I got big-hearted this morning and gave him a bum \$5.

Nan—What did your husband say about your generosity?

Ann—Thanks.

Boysish Voice (over the telephone)—Is this the Society for the Prevention of Cruelty to Animals?

S.P.C.A. Secretary—Yes.

Boysish Voice—Well, there's a book agent sitting in a tree in our front yard, and he's got Tower so excited he can't eat.

ESCAPED BOMB

A crude bomb exploded on the doorstep of the British Legation in Stockholm late last January, it was disclosed recently, after an unsuccessful two-month hunt for the culprit. Windows were shattered, but none of the legation staff was injured.

Java has more thunderstorms than any other country in the world.

Has Its Points

Many People Overlook The Health-Bestowing Qualities Of An Apple

The proverb about an apple a day keeping the doctor away has more truth in it than some of us may think.

Because apples are considered a more or less common fruit their actual health bestowing qualities are often underestimated. The wisdom of including apples in one's daily diet can hardly be questioned after reading what a bulletin on agriculture has to say about them. It stresses the following points:

"They are the source of natural fruit sugar and thus provide energy. Eaten raw between meals they satisfy the craving for sweets."

"The water contained in apples is in its purest form."

"They tend to promote proper elimination, as skin and the framework provide bulk and the organic salts are diuretic."

"Apples counteract a tendency to acidosis as they leave an alkaline ash. A well masticated apple thus aids digestion."

"Apples are a source of vitamins necessary to the body."

"One large apple gives 100 calories."—Kitchener Record.

Look out for Trouble from Sluggish KIDNEYS

Try the Original "Dutch Drops"

It is poisonous waste that your kidneys should be filtering out of your blood that may cause backache, dizzy spells, leg cramps, headache, and general feeling of smarting and burning. For relief use the remedy that has won the grateful thanks of thousands for many years—GOLD MEDAL Haarden Oil Capsules.

This effective diuretic and stimulant is the original and genuine Dutch Drops in carefully measured amounts in Golden Capsules. It is one of the most favorably known remedies for relieving congested kidneys and irritated bladder. It works swiftly, relieving the delicate filters of your kidneys to purify the blood.

Be sure you get the original and genuine—Search for the name in history, probably GOLD MEDAL Haarden Oil Capsules. 40c at your druggist.

International Force

Rumor In London Of Plan To Track Nazi War Criminals

Formation of an international detective force to track down Nazi war criminals is a story in the world in which they might take refuge has been widely reported in political circles in London.

The body will operate as a sort of Allied Nations' Scotland Yard, working with dossiers supplied by the war crimes commission and other evidence obtained in Germany. Headquarters will be in London it was said.

Picked men from several countries with wide experience in international police work will engage in the biggest manhunt in history, probably before the end of the war in Europe.

A single stalk of corn will lift approximately 440 pounds of water from the ground, and expel it through its leaves, in one short growing season.

"MECCA" OINTMENT

SUFFICIENT SUPPLIES OF WHEAT AVAILABLE IN CANADA AND U.S. FOR THE IMPORTING COUNTRIES

OTTAWA. Adequate supplies of wheat exist in Canada, the United States and Argentina to meet the needs of importing countries; the more immediate problem is the transportation and processing of sufficient wheat to meet these needs, the Dominion Bureau of Statistics said Saturday in a review of the world wheat situation.

A story from Ottawa indicated that there are 10,000 Canadian grain cars tied up in eastern United States where railways are using them for movement of war materials. Following a meeting of Canadian and U.S. government and railway officials at Washington, it was agreed that the cars should be returned to Canada.

Because of smaller requirements of wheat for feed in the United States in 1944 a "substantial quantity" of American wheat will be released for export, and the year end carry-over also is expected to increase, the bureau said.

If sufficient cars and ships become available, U.S. gross exports may exceed 140,000,000 bushels during the current crop year, leaving from 330,000,000 to 375,000,000 bushels for carry over at June 30, 1945. Although the volume of Canadian exports in 1944 is still uncertain it is not unlikely that stocks of wheat in Canada will fall below 300,000,000 bushels.

The bureau said Argentina, despite a poor crop, continues to hold a "fairly large" exportable surplus of wheat, and the new crop of 1,500,000 bushels should cover all domestic requirements for the calendar year 1945, leaving the equivalent of the total carry-over of old wheat for export or carry-over.

Australia, having cancelled all wheat export for 1945 is attempting to boost her wheat acreage from 8,300,000 acres seeded in 1944 to 11,500,000 acres, but is suffering from shortages of labor, tractors and superphosphates.

Fewer Strikes During First Two Months Of Year

OTTAWA. Time lost through strikes and lock-outs during the first two months of this year was 28.7 per cent less than for the corresponding period of 1944, the labor department announced.

Time lost due to the transportation dispute on the west coast in January was more than offset by a reduction in February.

A total of 38,963 man-working days were lost up to Feb. 28 in 32 strikes involving 10,397 workers, compared with 63,546 days lost in 44 strikes involving 16,877 workers a year ago. In February, 4,988 workers took part in 17 strikes which caused a loss of 6,821 man-working days, compared with 20 strikes involving 8,782 workers and causing a time loss of 39,888 days last February.

One strike was carried over from January and 16 began during February. Of these 17 strikes, nine were settled during February and in seven work was resumed pending final settlements. At Feb. 28 one strike was still in progress, involving freight car factory workers at Trenton, N.S.

APPEAL DISMISSED

German Prisoners of War Must Serve Jail Sentence

EDMONTON. Appeal of August Kaehler and Otto Stolski, German prisoners of war from the Lethbridge prisoner of war camp, against conviction and one-year sentence in jail for theft of a truck in an escape attempt was dismissed by the Alberta Appeal court.

The appeal was turned down in a written judgment which said there was no justification for making any qualifications of the general terms imposing criminal liability in the Geneva convention rules governing prisoners-of-war.

FORMER HUNGARIAN PREMIER

LONDON.—Moscow radio, quoting Budapest press reports, said the Germans had killed Dr. Nicholas Kallay, former Hungarian premier. Kallay, 68, had been deposed when the Germans occupied Hungary in March last year and installed a puppet regime.

REDUCE FARM DEBTS

Were Lowered By Thirty-One Per Cent. In 1944

TORONTO. Farm mortgage debts in the three prairie provinces were reduced 31 per cent in 1944, according to analysis prepared by the Dominion Mortgage and Investment Association.

The association bases its findings on the operations of 30 life insurance, trust and loan companies. Farmers in the three provinces owed these companies \$320,000,000 at the end of 1943 on farm mortgages and agreements of sale. In 1944 the total was reduced by more than \$40,000,000 to \$280,000,000.

The figures indicate the use to which farmers are putting part of their increased income, says the association's report. The 1944 payments on account of mortgage principal and interest were greater than in any previous year.

Manitoba farmers reduced their obligations from \$18,400,000 to \$13,000,000, a reduction of 29.4 per cent; in Saskatchewan the total owing to the institutions was reduced from \$83,600,000 to \$57,200,000, and in Alberta the drop was from \$27,800,000 to \$19,000,000. The percentage reduction for both Saskatchewan and Alberta was 31.5 per cent.

The total owing on mortgages and agreements for sale by Manitoba and Alberta farmers is now less than half the total seven years ago while Saskatchewan's reduction in the same period was 42.3 per cent.

Farm real estate held by life insurance, trust and loan companies in the three prairie provinces is now at the lowest level in many years, says the report.

POST-WAR PROGRAM

New Railway In Northern Saskatchewan And Alberta Urged

OTTAWA. Joseph M. DeChene (L.), Athabasca gave notice of a motion suggesting a post-war reconstruction program including establishment of a new rail and highway arteries in northern Alberta and Saskatchewan.

He suggested one line from Prince Albert through Meadow Lake, Sask., and extending in a westerly direction to the Cold Lake region in Alberta and through the area north of the Beaver river to Lac la Biche and Athabasca and the Peace River country. This line would link with the Northern Alberta Railway system and include the closing of a short gap on the Edmonton St. Paul-Turtleford line from Meisberg to Frenchman's Butte, Sask.

He also suggested consideration of a connection between St. Paul and Denberville in Alberta and the construction of a highway from Edmonton to Fort McMurray.

OLD ROMAN CITY FALLS TO ALLIES—A German prisoner is escorted by British guards through the gate of the old Roman city of Xanten, Germany, which was captured by British and Canadian forces.

GREATEST DRIVE ERROR IN JUDGMENT

Is How Germans Described Allied But R.A.F. Fliers Will Be Disciplined

Attack Across The Rhine

MADRID. The Germans say the Allied drive across the Rhine is "the greatest in intensity, preparation and size" ever launched in Europe.

These quotations were sent to the evening paper Alcazar by Joaquín Rodrigo, last of the Spanish correspondents in Berlin.

According to Rodrigo the artificial fog used by the Allies was "of a density hitherto unknown, which lasted for 30 hours."

Buy War Savings Stamps regularly.

For Accidental Bombing

LONDON. The government has expressed regret to the Netherlands for the "deplorable" accidental bombing of a residential area of the Hague by the R.A.F. in a March 3 attack on German rocket sites. It was promised that disciplinary action would be taken against fliers responsible for what was described as an "error of judgment."

Canada's poultry population is said to be six times greater than its human population.

AT INVESTITURE IN HOLLAND—Gen. Dwight D. Eisenhower, supreme Allied commander in western Europe, chats with Field Marshal Sir Bernard L. Montgomery (left), and Lt.-Gen. Omar Bradley (right) during the investiture held in Holland recently. Marshal Montgomery presented British decorations to American officers and Gen. Eisenhower presented American decorations to British officers.

ANTICIPATE NEW PROBLEMS IN PREVENTING INFLATION AT THE END OF THE WAR IN EUROPE

OTTAWA.—The end of the war in Europe will bring with it new problems in preventing inflation and shortages of some supplies—particularly foods and textiles—will continue, Donald Gordon, prices board chairman, said in his annual report tabled in the commons by Finance Minister Isley.

Recalling the sharp upward surge of prices after the First Great War, Mr. Gordon said in some respects the pressure on prices might be even greater after the present war. "The board's objective is to remove price control at the earliest feasible moment consistent with preventing a war-generated inflation," Mr. Gordon said. "In doing so it must look towards the gradual reduction and removal of subsidy payments."

While over-all food supply was better in 1944 than in 1943 shortages continued in butter, sugar and canned fruits and "there were a number of indications that supplies were becoming less plentiful as the year drew to a close."

During 1944 spending continued to increase, there was more evidence of the "deplorable" accidental bombing of a residential area of the Hague by the R.A.F. in a March 3 attack on German rocket sites. It was promised that disciplinary action would be taken against fliers responsible for what was described as an "error of judgment."

Canada's poultry population is said to be six times greater than its human population.

PRIME MINISTER CHURCHILL SAYS PEACE NEGOTIATIONS WILL REST WITH THE ALLIED POWERS

LONDON. Prime Minister Churchill in the House of Commons side-stepped a direct answer to a question whether Germany had sought peace "during recent months" and rejected a demand for assurance that parliament would be notified when and if such a moment arrives.

Phys. Davies, Labor, inquired whether "in view of the importance of bringing the war to an early close, do you think it fair that this parliament should not be told if and when the Germans are proposing to lay down their arms and the conditions under which they would be prepared to lay them down?"

"Has the German government made any proposals to lay down their arms and what are the conditions?" Mr. Churchill replied: "Such matters if they arise at any time would first of all enter immediately into the province of inter-Allied discussion. We should not be entitled to disclose any matters of that kind except purely military surrender at the front."

"On anything which touches peace negotiations and so on," he continued, "we should immediately communicate with our Russian and American Allies and the house would have to wait necessarily until these discussions had taken place. They will lie in the power of the crown which is vested in the executive."

Evelyn Waikelen, another Labor member, broke in to declare that "one soldier's life is more valuable than days of talk in parliament, and we have to stop shooting first and talk afterwards."

"The sounds very good," Mr. Churchill agreed. "I like it very much."

Just returned from the western front, Mr. Churchill was given a rousing ovation when he entered the chamber.

IN FAR EAST

How Canadian And British Airmen Saved India

VICTORIA. Story of how a handful of Canadian and British airmen in Ceylon probably saved the entire Allied position in the Far East early in 1942 was told here by Major M. G. Dover, E.D., of Calgary, who was in the Ceylon garrison artillery. He is on leave here.

Major Dover said if the Japs had struck at Ceylon a month earlier than they did the island probably would have been lost, and along with it India, for Ceylon commands the Bay of Bengal.

When the Japs did attack their task force of carriers and destroyers was spotted by a Catalina in command of Squadron Leader Birchall, R.C.A.F. He managed to get a signal off to base before being presumably shot down.

The defences were alerted by his message however and they got squadrons of Hurricane fighters off from Ceylon. They shot down at least 60 per cent of the attacking force of 76 Zeros and bombers.

BEEF FOR BRITAIN

Canada Shipping More To Offset Shortage From United States

OTTAWA.—An estimated 250,000-000 pounds of beef will be shipped to Great Britain during 1945, under plans disclosed here by officials of the agricultural department.

Canada's agreement with Britain is based on a minimum of 50,000,000 pounds, but this will be multiplied, to make up for the cut of 175,000-000 pounds in the next quarter under United States lend-lease, officials said. The U.S. reduction was announced recently in Washington.

During 1944, Canada shipped 105-000,000 pounds of beef.

FEAR FOR SAFETY

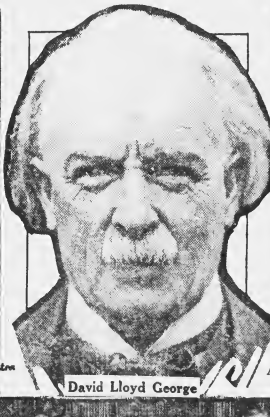

Red Cross Loses Contact With Thousands Of War Prisoners

BERN, Switzerland.—Fear for the ultimate safety of Allied war prisoners and conscripted foreign workers in Germany is increasing as the eastern and western offensives clamp a pinners tighter on the Reich.

The International Red Cross has lost contact with hundreds of thousands among the 15,000,000 prisoners and workers in Germany.
